

Libraries

```
In [1]: import numpy as np
import pandas as pd
from sklearn.preprocessing import StandardScaler
from sklearn.decomposition import PCA
from sklearn.model_selection import train_test_split
from sklearn.linear_model import LogisticRegression
from sklearn.metrics import confusion_matrix
import matplotlib.pyplot as plt
import seaborn as sns
```

Creating Sample Dataset

```
In [2]: data = {
'Height': [170, 165, 180, 175, 160, 172, 168, 177, 162, 158],
'Weight': [65, 59, 75, 68, 55, 70, 62, 74, 58, 54],
'Age': [30, 25, 35, 28, 22, 32, 27, 33, 24, 21],
'Gender': [1, 0, 1, 1, 0, 1, 0, 1, 0, 0] # 1 = Male, 0 = Female
}
df = pd.DataFrame(data)
print(df)
```

	Height	Weight	Age	Gender
0	170	65	30	1
1	165	59	25	0
2	180	75	35	1
3	175	68	28	1
4	160	55	22	0
5	172	70	32	1
6	168	62	27	0
7	177	74	33	1
8	162	58	24	0
9	158	54	21	0

Standardizing the Data

```
In [3]: X = df.drop('Gender', axis=1)
y = df['Gender']
scaler = StandardScaler()
X_scaled = scaler.fit_transform(X)
```

Applying PCA

```
In [4]: pca = PCA(n_components=2)
X_pca = pca.fit_transform(X_scaled)
X_train, X_test, y_train, y_test = train_test_split(X_pca, y, test_size=0.3, random
model = LogisticRegression()
```

```
model.fit(X_train, y_train)
y_pred = model.predict(X_test)
```

```
In [5]: cm = confusion_matrix(y_test, y_pred)
plt.figure(figsize=(5,4))
sns.heatmap(cm, annot=True, fmt='d', cmap='Blues', xticklabels=['Female', 'Male'],
plt.xlabel('Predicted Label')
plt.ylabel('True Label')
plt.title('Confusion Matrix')
plt.show()
```

PCA Result

```
In [6]: y_numeric = pd.factorize(y)[0]
plt.figure(figsize=(12, 5))
plt.subplot(1, 2, 1)
plt.scatter(X_scaled[:, 0], X_scaled[:, 1], c=y_numeric, cmap='coolwarm', edgecolor='k')
plt.xlabel('Original Feature 1')
plt.ylabel('Original Feature 2')
plt.title('Before PCA: Using First 2 Standardized Features')
plt.colorbar(label='Target classes')
plt.subplot(1, 2, 2)
plt.scatter(X_pca[:, 0], X_pca[:, 1], c=y_numeric, cmap='coolwarm', edgecolor='k')
plt.xlabel('Principal Component 1')
plt.ylabel('Principal Component 2')
plt.title('After PCA: Projected onto 2 Principal Components')
plt.colorbar(label='Target classes')
plt.tight_layout()
plt.show()
```
